DETAILED ACTION

1. Applicants amendment filed on 5/12/06 has been fully consideration and made of record.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 28-40 and 46-48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear as to what being referring as "first connector and second connector" (see claims 28, lines 2 and 3). Since, the specification only discloses the "optics connector" and "optics circuitry". Please clarify.

4. Claims 28-35 as best under stood are rejected under 35 U.S.C. 102(b) as being anticipated by August et al (US 4,911,645). This rejection is set forth in prior Office Action, paragraph 7, dated 2/9/06.

5. Claims 35 is rejected under 35 U.S.C. 103(a) as being unpatentable over August et al (US 4,911,645). This rejection is set forth in prior Office Action, paragraph 9, dated 2/9/06.

6. Claims 36 and 46-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over August et al (US 4,911,645) in view of Imamura (5,219,292). This rejection is set forth in prior Office Action, paragraph 10, dated 2/9/06.

Response to Arguments

Applicant's arguments filed 5/14/06 have been fully considered but they are not persuasive.

Re. 112. the amendment to the claims still raises issues of 112 (see above).

Re. Prior art. Applicants arguments that the prior art fails to teach the subject matter as recited in their claims such as a first circuit board having a first electrical contact and connector; a second circuit board having a second electrical contact and connector (see under their "Remarks", page 7-8). The Examiner disagrees, in that applicants are referred to August reference, especially, Fig. 1 which shows a connection system having the above configuration requirements such as where a first circuit board having a first electrical contact 101 and connector 102; a second circuit board 105 having a second electrical contact 101 and connector 108. Therefore, the broadly claimed features as described above are met by August reference, and the prior art rejection is valid.

For all reasons above, Applicants' arguments are not persuasive and are not clearly point out the patentable novelty which they thinks the claims present in view of the state of the art disclosed by the references cited or the rejections made.

Interviews After Final

7. Applicants note that an interview after a final rejection will not be granted unless the intended purpose and content of the interview is presented briefly, in writing (the agenda of the interview must be in writing). Such an interview may be granted if the examiner is convinced that disposal or clarification for appeal may be accomplished with only nominal further consideration. Interviews merely to restate arguments of record or to discuss new limitations which would require more than nominal reconsideration or new search will be denied. See MPEP 714.13 and 713.09.

Conclusion

8. It is noted that any amendment made to the disclosure and the claims. Applicant requires to point out the support provide numeral references to the claimed limitations as well as support in the disclosure (i.e., page and line numbers and reference number associated with from the drawings) for better clarity (See 37CFR 1.111 and section 2163.06 of the MPEP).

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
